

Do More with Healthcare Automation

Enterprise Software Solutions for Exceptional Patient Care

PATIENTS OVER PROCESS

The patient journey is at the center of everything healthcare professionals do, yet obstacles can stand between your team and the patients – mounds of data entry, information management, financial operations, and more. How can you concentrate on ensuring the highest quality of patient care when the burden of operations and taxing processes are holding you back?

The Solution - Enterprise Automation

Document Management – Automate the filing and indexing of your documents.

Web Forms – Collect information externally, and connect your company internally.

BPM Workflow – Take control of your business processes.

Data Capture – Easily convert the data needed to power your business.

System Integration – Integrate with existing systems to keep your data accurate.

Optimize hospital administration and enhance existing operations, maximizing the performance of your entire team. We help you identify and resolve inefficiencies in every aspect of your organization.

- Patient Records
- HR Management & Certifications
- Finance, Billing, Collections

HELEN ELLIS MEMORIAL HOSPITAL

"With an ongoing need for rapid access to patient files as well as a growing room cramped with two years' worth of records, it was clear that Helen Ellis needed a powerful Document Management solution – and fast."

The DocuPhase Enterprise Automation Platform allowed Helen Ellis to:

- Convert 33 file cabinets' worth of documents to electronic files
- Improve client relationships
- Expand the platform to Accounts Payable and Finance departments
- Increase effectiveness throughout the organization

FLORIDA-BASED HME COMPANY

Florida-Based HME Company, a medical homecare provider, was struggling to realize their true potential for scale and began searching for a document management and automation solution.

Implementing the DocuPhase solution solved the problems they had identified, and produced these results:

- 260% increase in productivity
- 330% increase in patient volume, without the need for additional overhead
- 75% decrease in costs
