

ENTERPRISE AUTOMATION VS. POINT SOLUTIONS

ENTERPRISE AUTOMATION VS. POINT SOLUTIONS

**Stop wasting your time and money!
Here's how an Enterprise Automation Platform
can help you hold onto your resources.**

Today's software vendors offer solutions for just about anything your business needs. The problem starts to develop when a company has acquired too many of these single-purpose solutions, also called point solutions, and the investment and administrative responsibilities begin to add up. It becomes a lot for the CIO to manage, and training is a beast because there are so many systems to learn to use.

What's the alternative? Find a **single solution** for all of these needs – an **Enterprise Automation Platform**.

WHY GO WITH AN ENTERPRISE AUTOMATION PLATFORM?

Fully integrated data

Data is entered automatically and synced across all of your systems. Information is up-to-date and easy to find.

Consistent support

One support rep can cover all of your departments and processes, bringing a holistic understanding of your big picture and goals.

Simplified training

Because they'll only need to learn one new system, new hires can be up and running faster than ever before.

Encourages inter-office communication

Your whole team is united and working within the same system, towards the same goals.

Limitless growth of initial investment

With a standard, repeatable approach, the solution can expand from one department to the next.

START ANYWHERE, GO EVERYWHERE

Most organizations **start with Accounting Automation**, and expand to other departments from there.

Automate critical accounting processes:

- ✓ Data Entry
- ✓ Accounts Payable
- ✓ Accounts Receivable
- ✓ Purchasing & Approvals
- ✓ GL Coding
- ✓ Expense Management
- ✓ Vendor & Contract Management

Reduced Processing Time

Alimera Sciences was able to **reduce invoice processing time by 93%** with DocuPhase's Accounting Automation solution.

"Our AP Clerk has found that the program itself has been somewhat of a God-send in the fact that it's lessened her workload tremendously. We're now able to look at other areas and processes and see where we could benefit."

Phil Jones, VP of Finance
